SCHEDULE F GEOLOGICAL INFORMATION BY COUNTY

First-time filer(s) who did not submit this data in prior years must complete this schedule in its entirety. Previous filers need
only submit additional or new information.

□ No

□ No

All data submitted for first time?	

EXPLORATION INFORMATION

Additional or new data submitted?

For each core/rotary drill hole, prospect pit/trench or point of information identified on the map submitted.

- 1. Type of opening (core hole, rotary hole, prospect sample, etc.).
- 2. Collar elevation of drill hole or elevation of prospect opening.
- 3. Copy of complete core logs or driller's log. For rotary holes and other openings where no log is available, provide a summary which lists the seam name, total seam thickness, total partings, thickness and bottom of coal elevation.
- 4. Indicate if the hole was electrically logged or not.

B. ANALYTICAL INFORMATION

For each coal seam identified on the exploration and prospecting records furnished under Part A above, supply a complete summary or copies of laboratory analyses outlining the following information:

- 1. Data point identification number.
- 2. Standard proximate analysis results: moisture, BTU, ash, sulphur, fixed carbon and volatile, on an as-received basis. Other tests on the sample (FSI, fusion, Arnaud, etc.).
- 3. If float-sink was done on the sample, provide the results of this test including BTU, ash, fixed carbon, volatile and sulphur values of the float material on a dry basis.
